Follow up from November's Session

Slideshark remote feature

- Follow up on Slideshark demo from November's MUG session.
- Slideshark has implemented a remote feature to control PowerPoint presentations on iPad via the iPhone.
- Slideshark is currently available only on iPhone and iPad.
- More information is available at http://www.slideshark.com

Evernote

What is Evernote and what can I do with Evernote?

- Allows you to create notes, sync them across multiple devices, and collaborate or share information with others.
- Can be accessed via the web, computer through the Evernote local client, and mobile device.
- Works with: iPhone, iPad, Windows Phone, Android, and Blackberry
- (Create) What can a note contain?
  - ➢ Text
  - ➢ Files (Word, Excel, PowerPoint, PDF)
  - ➢ Web content (Use Evernote Clearly browser add-on to clip web content)
  - ➢ Images
  - ➢ Voice memos
- (Organize) How do I keep up with everything and find the notes I need?
  - ➢ Notes can be placed into Notebooks
  - ➢ Notes can be tagged with keywords to make them searchable
  - ➢ Notes can also be geo-tagged making them searchable by location (mobile devices)
  - ➢ Text within JPEG images can be searched
  - ➢ Text within PDF files can be searched
  - ➢ Handwritten text is also searchable (Within notes shared from Penultimate)
- (Sync) Are my notes accessible from all of my different devices?
  - ➢ Notes are synced within your Evernote account and are accessible via web, computer, and mobile device.
- (Sharing)
  - ➢ With a free account, you can share individual notes or entire notebooks.
  - ➢ If you want to allow others to edit notes you've shared, you will need a premium account.

  - ➢ Notes are placed into note sets
  - ➢ Notes can be searched by keywords
- (Sync) Are my notes accessible from all of my different devices?
  - ➢ Notes are accessible from device they were created on.
- (Sharing)
  - ➢ You can share notes by email
  - ➢ You can upload notes into Google Docs, Dropbox ,or Evernote and share via those applications.
- More information is available at http://www.paperportnotes.com/

Quick Organizational Tips for iPad/iPhone

- Go to apps: Place along the bottom row visible on each screen of the iPad/iPhone
- Creating Folders: Use folders to organize your apps
- Multi-Tasking: Allows user to switch quickly between open apps. Also allows apps to be closed out that are no longer needed.
- Home Screen Bookmarks: Make frequently visited websites into an icon on mobile device screen for easy and quick access.

Additional Tips and App Suggestions from Those in Attendance

- Can use CourseEval and Survey Monkey for survey completion on iOS devices.
- iAnnotate PDF
- Splash ID for password protection
- FormConnect for developing fillable forms on the fly
- OmniFocus for project/task management
- MyPoint PowerPoint Remote for controlling PowerPoint presentations on your computer
